Profile

Motivated Applied Data Science undergraduate with hands-on experience in **Python, R, SQL** and **Power BI**. Skilled in data cleaning, predictive modeling, and dashboard development, with experience delivering actionable insights through end-to-end analytics projects. Actively seeking a data science or analytics internship to apply skills to real-world business problems.

Technical Skills

- **Programming:** Python, R, SQL
- **Visualization Tools:** Power BI, Excel
- **Data Analysis:** EDA, Data Cleaning, Feature Engineering, Machine Learning
- **Tools and Technologies:** Streamlit, SQL Server

Soft Skills

- Teamwork
- Adaptability
- Communication Skills
- Time Management
- Critical Thinking
- Leadership
- Creativity

Education

- General Sir John Kotelawala Defence University** Rathmalana
Bachelor of Science in Applied Data Science Communication 2024 - 2027
- **Relevant Coursework:** Fundamentals of Mathematics and Statistics, Programming with Python and R, SQL for Data Science and Cloud Databases, Data Mining, Applied Machine Learning, Data Science and Artificial Intelligence, Data Visualization and Storytelling, Business Economics and Management, Research Methods, Industry-Sponsored Dissertation, Industrial Training.
- Open University of Sri Lanka** Matara
Short Course in Human Resource Management Apr 2023 – Oct 2023
- **Relevant Coursework:** Covered training and development strategies, employee skill enhancement, organizational effectiveness, and alignment of workforce competencies with company objectives. Completed a final project analyzing the mutual impact of training programs on employee career growth and organizational performance.
- Sujatha Vidyalyaya Matara** 2010–2022
G.C.E. Advanced Level

Projects

- Olympic Analytics Dashboard** | *SQL, Power BI*
- Built an interactive dashboard comparing Summer and Winter Olympic performance, analyzing country-wise medals, participant trends, and seasonal distributions. Provided clear insights into global Olympic trends using data visualization and analytical techniques.
- Telco Customer Churn Prediction** | *SQL, Python, Power BI*
- Developed a machine learning project to analyze telecom customer data and predict customer churn. Used SQL for data preparation, Python for data analysis and model building, and Power BI to create interactive dashboards. Identified key factors influencing churn to support data-driven retention strategies.
- UK Visa Applications Analytics Dashboard** | *SQL, Power BI*
- Built an end-to-end analytics solution analyzing UK study and work visa trends (2010–2023), using SQL for data cleaning and modeling and Power BI for interactive dashboards. Identified key patterns in application growth, top contributing countries, sector demand, and seasonal trends.

AI-Powered Policy Summarization and Scenario-Based Policy Generation System | Python, NLP, Streamlit

- Developed an AI-based application to summarize policy documents and generate scenario-specific policy drafts. Implemented text preprocessing and integrated the Groq API with the LLaMA 3.3 70B model for abstractive summarization and policy generation. Built an interactive Streamlit interface for uploading text and generating structured outputs.

Canada Workforce Immigration Analytics Dashboard | SQL, Power BI

- Developed an interactive dashboard analyzing Temporary Foreign Worker and International Mobility Programs (2015–2024), highlighting trends in provincial distribution, occupational demand, and COVID-19 impacts. Delivered insights on workforce needs in tech, healthcare, and skilled trades.

Heart Disease Prediction with Explainable AI | Python, Machine Learning, SHAP

- Built ML models (Logistic Regression, Random Forest, XGBoost) using the UCI dataset to predict heart disease with high accuracy. Applied SHAP for interpretability, identifying key risk factors such as chest pain type, maximum heart rate, and ST depression. Evaluated models using standard metrics (Accuracy, F1, ROC-AUC) to support reliable and explainable clinical insights.

Certificates

- Python for Beginners – University of Moratuwa
- Python Programming – University of Moratuwa
- Web design for beginners – University of Moratuwa
- Foundations of Project Management – University of Moratuwa
- Certificate of Participation – “Sentiment Seekers” Data Odyssey Exhibition

Other Qualifications and Achievements

- * Recipient of the President’s Guide Award - Sri Lanka (2022)
